# Formula 300

## Economy Tractor Fluid

Formula 300 economy tractor hydraulic and transmission oil is designed to be an economical lubricant for farm, industrial tractors and construction equipment. Formula 300 economy tractor fluid contains an EP and anti-wear additive package that inhibits rust, corrosion and oxidation in farm equipment. Formula 300 economy tractor fluid provides efficient lubrication properties in regards of lubricity, wear protection, compatibility with seals, O-rings, and packing materials, oxidation stability and water tolerance when economy is a major factor. Formula 300 economy tractor fluid is recommended for service ambient temperatures between +32F and 104F (0C to 40C). For ambient temperatures outside this range, where a premium tractor hydraulic/transmission oil is required, for severe service conditions, or for use in modern tractors, use Hicks Formula 500 Premium Tractor Transmission & Hydraulic Fluid.

Always follow equipment manufacturers' recommendations for type and quality of oil and drain intervals.

### Typical properties:

Product: Formula 300 Economy Tractor Fluid	
Product Code	90019
Kinematic Viscosity @ 100 °C cSt (ASTM D-445)	7.5
Kinematic Viscosity @ 40 °C cSt (ASTM D-445)	44.0
Viscosity Index (ASTM D-2270)	138
API Gravity (ASTM D-1298)	32.0
