FORMULA 500

DEXRON VI Automatic Transmission Fluid

Formula 500 Dexron® VI is a fully formulated fluid specially designed for use in General Motors automatic transmissions. Dexron® VI is the only GM approved specification for vehicles of model years 2006 and newer. It provides smooth shifting, even in GM's new Hydra-Matic 6L80 transmission.

Formula 500 Dexron® VI provides superior friction durability as required by the Dexron® VI specification, thereby offering satisfactory operation over the life of the vehicle.

Formula 500 Dexron® VI is a fully synthetic product, with excellent oxidation stability, shear stability, and provides excellent low temperature fluidity to ensure proper operation of today's transmissions fitted with electronic controls and smaller orifices.

Typical Properties:

Product:	Formula 500 Dexron® VI
Product Code	10498
Kinematic Viscosity @ 100 °C cSt (ASTM D-445)	6.0
Kinematic Viscosity @ 40 °C cSt (ASTM D-445)	28.3
Viscosity Index (ASTM D-2270)	175
API Gravity	27.0
Pour Point (ASTM D-97)	-40.0
