FORMULA 500

Type F Transmission Fluid

Type F transmission fluid is designed to meet the Ford specification M2C33-F. Transmissions calling for Ford specification M2C33-F, also known as type F transmission fluid, have unique requirements that are difficult to meet with traditional multipurpose transmission fluid. For this reason, it is necessary to have a fluid specifically for transmissions calling for a type F fluid.

Since Ford specification M2C33-F is an obsolete specification it is not uncommon to find fluids in the market place that are of poor quality. Formula 500® continues to blend type F transmission fluid to specification with a proven additive package specifically designed for this unique specification.

Always consult the owner's manual and follow the manufacturer's recommendations for the proper transmission fluid.

Typical properties:

Product: Type F (Ford Specification M2C33-F) transmission fluid	
Product Code	1333
Color	Red
Kinematic Viscosity @ 100 °C cSt (ASTM D-445)	7.2
Kinematic Viscosity @ 40 °C cSt (ASTM D-445)	36.0
Viscosity Index (ASTM D-2270)	180
API Gravity (ASTM D-1298)	33.4
